### PROFESSIONAL EXPERIENCE

#### Software Engineer Intern | July –August 2024

SEYTIM(Seyhan Belediyesi Teknoloji ve Inovasyon Merkezi) | Adana

- I have developed web applications using front-end and back-end technologies (PHP, Laravel, Bootstrap, jQuery).
- I have worked on database management and optimization to improve system performance(Mysql, Eloquent ORM).
- By conducting regular meetings and code reviews, we ensured effective communication within the team.

### EDUCATION

#### Çukurova University | 2021-2026(Continue)

Bachelor's Degree in Computer Engineering

### SKILLS

#### PHP | Laravel

I have developed many projects with Laravel

#### HTML CSS | Bootstrap

#### Javascript | React

#### Swift | UIKit

### PROJECTS

#### **Blogram : A multi-user live blog website built with Laravel** ([blogram.com.tr](https://blogram.com.tr))

- A real blog site with many features, where users can log in with Google and GitHub and create posts using a text editor.
- Technologies Used: Laravel, Livewire, Bootstrap, jQuery, Caching, Database Relationships, Jodit Text Editor, OAuth2

#### **A document assignment system for veterinarians built with Laravel.**

- Actively used by the Ministry of Agriculture staff in Mersin – currently live and operational in production.
- Designed dynamic, rule-based document distribution logic with real-time adjustments based on leave schedules and yearly work quotas.
- Enabled calendar-based leave and duty tracking with intelligent conflict detection and fair redistribution of tasks.

#### **Sudoku Game with Swift-UIKit**

- An iOS mobile Sudoku game where I used Lottie-iOS and my own animations.

### LANGUAGES

- English(B1+)
- Turkish(Native Language)
